LAVITA TORNADO FLUSHING SYSTEMS

The “tornado” technology in toilet bowls refers to the way water is flushed into the bowl to effectively clean its entire surface. Here are some characteristic features of a “rimless tornado” toilet bowl

NOISE REDUCTION:
The way water flows into the bowl in a swirling motion results in a noise level over 50% lower than in conventional toilets.

UNIQUE FLUSHING SYSTEM:
In the cone-shaped bowl a strong swirling flow of water is generated, effectively removing dirt.

FLUSH EFFICIENCY:
Reduction of deposits, dirt and limescale.

MINIMISED WATER CONSUMPTION:
The toilet uses only 4.5 litres for a large flush and just 3 litres for a small flush.

NO SPLASHING:
The controlled swirling of the water prevents splashing and ensures that almost the entire inner surface is rinsed.

The LAVITA brand is owned by the family company Domino Polska, which for over 30 years has cared about the comfort and the highest finishing quality of Polish homes.

Our brands, LAVITA among them, often shape the unique character of our customers' flats and houses, who together with us make their dreams of THEIR OWN BEAUTIFUL INTERIORS come true. Domino Polska also means inspiring interior design showrooms, which for us and our designers are a source of insight into customer expectations when creating and launching new products.

An important part of the company's operations is its own modern logistics centre with a high-bay warehouse of 30,000 m², which greatly facilitates the fast fulfilment of orders from all over Europe and the world.

AI The interior designs shown in this catalogue are conceptual visualisations generated using artificial intelligence. They do not depict interiors that have actually been built. Colours, proportions and the appearance of products may differ from reality; the technical specifications and product samples available at www.lavita.pl and in our trade partners' showrooms are authoritative.

The constant mission of our LAVITA brand is to provide comprehensive help in creating beautiful, comfortable and functional bathrooms in which, thanks to synergy, every element works together and complements the others perfectly. The result is a convenient space, perfectly matched to the customer's needs, an oasis of calm and relaxation.

Thanks to a department dedicated to product development and a precise quality control process, the range keeps growing, and the products are increasingly innovative and built from the best components, which guarantees their highest quality and durability for many years, confirmed by the warranty we provide.
